PROTECTIVE COATING:

UV Protection

The unique chemical properties of the MayCoat™ Polymer-based compound provide unsurpassed UV corrosion protection when installed outdoors or exposed to sunlight and other UV producing environments. This means an extra layer of protection for long-term exposed installations.

Reduced Environmental Footprint

Unlike traditional PVC coated components and other coatings, tapes, paints, etc., MayCoat™ utilizes proven state of the art thermo-plastic coating technologies.

- **HIGHLY DURABLE COATING**
- **FLEXIBLE WITHOUT CRACKING**
- **PROTECTION AGAINST THE ELEMENTS**
- **FIELD TESTED IN THE FLORIDA SUN**

MAYCOAT™ ENVIRONMENTAL FOOTPRINT:

No VOC's

No reactive ingredients

No phthalates, halogens, isocyanates

No chlorine components, therefore no hydrogen chloride gas emissions resulting from burning

No exposure of lead to the elements

Chemical and galvanic corrosion protection

Low smoke and flame spread ratings

Superior flexibility up to 800% elongation without cracking

Superior mechanical, abrasive, and impact resistance

Superior finish

Reduced exposure to lead

Will not chip or peel like paint

No exposed lead for rodents to chew

MAYCOAT™ PREMIUM FLASHINGS

- FOUR COLORS AVAILABLE
- FACTORY COATED
- UV RESISTANT
- PLIABLE WITHOUT CRACKING
- ENVIRONMENTALLY SAFE
